IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

## HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

B. If applicant claimed SMALL ENTITY status before, or is now claiming SMALL ENTITY status, check box 5a on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and 1/2 the ISSUE FEE shown above.

II. PART B - FEE(S) TRANSMITTAL, or its equivalent, must be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted. If an equivalent of Part B is filed, a request to reapply a previously paid issue fee must be clearly made, and delays in processing may occur due to the difficulty in recognizing the paper as an equivalent of Part B.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

**IMPORTANT REMINDER:** Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

#### **DETAILED ACTION**

##### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on July 31, 2009, has been entered.

##### ***Response to Arguments***

2. Applicant's arguments, see pages 7-9, filed July 31, 2009, with respect to claim 1 have been fully considered and are persuasive. The rejection of claims 1, 2, 4-7, and 12-19 has been withdrawn.

##### ***Allowable Subject Matter***

3. Claims 1-2, 4-7, 12-13, and 15-19 are allowed.

4. The following is an examiner's statement of reasons for allowance: The prior art of record does not appear to anticipate or render obvious the limitations of the hydrodesulfurization catalyst recited in claim 1. The prior Office action asserted that Baker, Jr. et al (US 5951848) disclosed the recited catalyst having tungsten and nickel in the required concentrations as well as recited total pore volume. However, the catalyst possessing the required properties is a hydrocracking catalyst used in a pre-treatment step prior to the hydrodesulfurization and dewaxing process steps. Furthermore, Baker, Jr. et al discloses that the hydrotreating catalyst provides no viscosity index improvement [column 9, lines 4-5]. The reference also teaches the use of noble metals such as platinum and palladium as preferred catalytic metals. While other Group VIII metals may also be used, their incorporation is less desired because they possess less hydrogenation activity [column 8, lines 44-56]. Therefore, Baker, Jr. et al appears to teach away from the use of nickel and tungsten on the hydrotreating catalyst. The nearest prior art appears to be Ziemer (US 5543035). Ziemer discloses a catalyst comprising a zeolite, wherein the catalyst contains less than 8%

zeolite, a hydrogenation component and from about 30 to about 90 percent by weight of a silica-alumina matrix material having a silica/alumina mole ratio in the range of between about 10/90 and 90/10. The catalyst has a pore volume in the range of 0.25 and about 0.60 cm<sup>3</sup>/g. and preferably at least 15 percent of the pore volume is in pores having a diameter greater than 350 angstroms [column 4, lines 27-44]. The Group VIII metal (nickel) is present in an amount from 2 to 10% by weight and the Group VI metal (tungsten) is present in an amount from 5 to 30% by weight [column 5, line 58 to column 6, line 12]. However, Ziemer discloses that the process is a hydrocracking process rather than a hydrodesulfurization process. The reference also appears to indicate that total pore volumes less than 0.4 cm<sup>3</sup>/g are preferred [see examples 1 & 2 and the summary table in column 10]. Also, Ziemer does not appear to disclose the separating step. Discussions of other similar prior art references follow.

5. Moreaux (US 6051127) discloses a hydrotreating catalyst with Group VI and Group VIII metals such as tungsten and nickel, respectively. The reference also appears to disclose the separating step [see, e.g., claim 1(b)] and dewaxing step required in claim 1 of the instant application. However, the reference seems to indicate that a preferred support is a fluorided alumina support [see column 4, lines 4-7 & example 1] and, therefore, appears to teach away from the non-fluorided hydrodesulfurization catalyst required in the instant application. Guichard et al (EP 0666894 B1 or, alternatively, WO 94/10263 or US 5378351), which was used as prior art in an application disclosing a similar process to the instant application (application number 10/479900, now US 7261806), teaches a similar hydrodesulfurization catalyst as that recited in instant claim 1; i.e., a nickel/tungsten catalyst on an acidic, amorphous silica-alumina support with the required total pore volume, metal concentrations, and alumina content [see, e.g., column 2, lines 46-54 of EP 0666894]. However, the reference appears to lack the combination of the silica-alumina with the large pore molecular sieve as well as the separating step instant claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
